

K S R Institute for Engineering and Technology

Tiruchengode, Namakkal (Dt) , Tamil Nadu

(Approved by AICTE, Affiliated to Anna University, Accredited by NAAC (A+) & NBA)

1.1.1 The Institution ensures effective curriculum delivery through a well-planned and documented Process.

Lr. No. 02/AFFLN/CAI/CBE/AU/2022-2023/7316

Date : 12-08-2022

To

The Principal
K S R Institute for Engineering and Technology
K S R Kalvi Nagar, Tiruchengode - 637215.

KSRILEY - TIRUCHENGODE	
Invoice No:	3624
Date:	16/8/22
Attention:	
Principal:	
File No:	

Sir,

Sub : Anna University - Provisional Affiliation for the Existing course(s) / New course(s) / Variation in intake - U.G. / P.G. for the academic year 2022-2023 - granted - Reg.

- Ref : 1. Your application for affiliation for the academic year 2022-2023
2. AICTE / COA / DGS Approval for the academic year 2022-2023 - submitted by the college

I am to inform that under the provisions of Section 7.6.1 of the Statutes for Affiliation of Anna University, Chennai, **Provisional Affiliation** for the continuation of the existing course(s) / new course(s) / variation in intake in the existing course(s) is granted for the following U.G / P.G. courses with the sanctioned intake mentioned against each course for the academic year **2022-2023** at **K S R Institute for Engineering and Technology, K S R Kalvi Nagar, Tiruchengode - 637215.**

Sl. No.	Degree	Course(s)	Sanctioned Intake	
			2021-2022	2022-2023
1.	B.E.	BioMedical Engineering	60	60
2.	B.E.	Computer Science and Engineering	60	90
3.	B.E.	Electrical and Electronics Engineering	60	60
4.	B.E.	Electronics and Communication Engineering	60	60
5.	B.E.	Mechanical Engineering	60	60
6.	B.Tech.	Information Technology	60	60
7.	M.E.	Big Data Analytics	6	6
8.	M.E.	CAD/CAM	6	6
9.	M.E.	Embedded System Technologies	6	6
10.	M.E.	Software Engineering	6	6
11.	B.E.	Computer Science and Engineering (Cyber Security)	-	60

The above said Provisional Affiliation is being granted subject to the fulfillment of the conditions mentioned below:

- Production of originals of AICTE / COA / DGS approval and all other related documents for verification, whenever demanded by the University.
- Verification by a Committee towards the fulfillment of the conditions mentioned above and the

continued fulfillment of the requirements for the above-mentioned course(s) as per the norms and standards of AICTE / University and the laboratory requirements as per the curricula and syllabi of Anna University, Chennai for the above courses. In the event of any violation/infringement of the above said conditions and / or the provisions of Anna University, Chennai Act / Statutes / Regulations, AICTE Act, norms & standards / regulations / guidelines or any other law being in force, suitable action including suspension / withdrawal of affiliation of course(s) may be initiated against the college.

- Students should not be admitted for the above course(s) for the next academic year 2023-2024 without obtaining the order of continuation of provisional affiliation for the next academic year from the University.

The Provisional Affiliation is granted without prejudice to the right of the University of requiring production of certificate required under Section 37-B of TAMILNADU Reforms (LC) Act 1961 subject to the decision of the Hon`ble High Court of Madras in W.A. No. 3454 / 2002 batch and W.A. No. 3482 / 2002 batch.

COURSE PLAN

Degree / Program	B.E. & ECE	Academic Year, Semester	2022 – 2023, ODD
Course Code & Course Title	EC8553 & DISCRETE TIME SIGNAL PROCESSING	Year / Sem.	III / V
Name of the Faculty & department	Ms.B.LATHA	Regulation	R2017
Email	blatha@ksriet.ac.in	Contact No	9042369586

INTRODUCTION ABOUT THE COURSE:

Discrete time Signal Processing is an area of Science and Engineering that has developed rapidly over the past 40 years. This rapid development is a result of significant advances in digital computer technology and integrated-circuit fabrication. The digital computers and associated digital hardware of four decades ago were relatively large and expensive. So their uses were limited to general purpose non-real time scientific computations and business applications.

The rapid development in integrated circuit technology, starting with medium scale integration(MSI) and progressing to Large Scale integration(LSI) and now Very Large Scale integration (VLSI) of electronic circuits has spurred and development of powerful, smaller, faster and cheaper digital computers and special purpose hardware. These inexpensive and relatively fast digital circuits have made it possible to construct highly sophisticated digital systems capable of performing complex digital signal processing functions and tasks which are usually too difficult and/or too expensive to be performed by analog circuitry or analog signal processing systems.

Hence many of the signal processing tasks were conventionally performed by analog means are realized today by less expensive and often more reliable digital hardware. For many signals, with extremely wide bandwidths, real time processing is required. For such signals, analog or optical signal processing is the only possible solution. However, where digital circuits are available and have sufficient speed to perform the signal processing, they are usually preferable.

Not only do digital circuits yield cheaper and more reliable systems for signal processing, they also have other advantages as well. In particular, digital processing hardware allows programmable operations. Through software, one can more easily modify the signal processing functions to be performed by hardware.

K S R INSTITUTE FOR
ENGINEERING AND TECHNOLOGY,
K S R KALVINAGAR,
TIRUCHENGODE-637 215,
NARAYAKAL DI. TAMIL NADU.

Thus digital hardware and associated software provides a greater flexibility in system design. Also there is often a higher order precision achievable with digital hardware and software compare with analog circuits and analog signal processing systems. For all these reasons there has been an explosive growth in digital signal processing theory and applications for the past three decades.

OBJECTIVES:

- To learn discrete fourier transform, properties of DFT and its application to linear filtering
- To understand the characteristics of digital filters, design digital IIR and FIR filters and apply these filters to filter undesirable signals in various frequency bands.
- To understand the effects of finite precision representation on digital filters.
- To understand the fundamental concepts of multi rate signal processing and its applications.
- To introduce the Digital Signal Processors with Architecture, Programming and its applications.

APPLICATIONS:

The main applications of DSP are audio signal processing, audio compression, digital image processing, video compression, speech processing, speech recognition, digital communications, RADAR, SONAR, Financial signal processing, seismology and biomedicine.

- Cellular phone, radar
- Audio and video signal processing
- Speech processing
- Narrow band filtering for ECG/EEG

PREREQUISITES:

Students should have basic knowledge of the following topics:

- ✓ Basics of signals, systems, transforms and their theoretical & analytical foundations for practical implementation.
- ✓ How the issues arise in mathematical & practical domain in the continuous & discrete time, linear time invariant systems, convolution and Fourier transforms.

COURSE OUTCOMES:

Upon Completion of the course, the students will be able to

CO1: Apply DFT for the analysis of digital signals and systems.

CO2: Design and Realize IIR filters.

CO3: Design and Realize FIR filters.

CO4: Characterize the effects of finite precision representation on digital filters.

CO5: Explain the architecture and functionalities of Digital Signal Processors.

PROGRAM OUTCOMES (POs)			
PO1	Engineering Knowledge	PO7	Environment and sustainability
PO2	Problem Analysis	PO8	Ethics
PO3	Design/development of solutions	PO9	Individual and team work
PO4	Conduct investigations of complex problems	PO10	Communication
PO5	Modern tool usage	PO11	Project management and finance
PO6	The Engineer and society	PO12	Life-long learning
PROGRAM SPECIFIC OUTCOMES (PSOs)			
PSO1	Embedded system design: Analyze, design, construct and test electronic and embedded systems for desired specification.		
PSO2	Simulation Tools: Solve emerging real world problems using suitable hardware and software tools.		

Mapping of Course outcomes (COs) to Program Outcomes (POs) and Program Specific Outcomes (PSOs)

UNIT – I DISCRETE FOURIER TRANSFORM						
Review of signals and systems, concept of frequency in discrete-time signals, summary of analysis & synthesis equations for FT & DTFT, frequency domain sampling, Discrete Fourier transform (DFT) - deriving DFT from DTFT, properties of DFT - periodicity, symmetry, circular convolution. Linear filtering using DFT. Filtering long data sequences - overlap save and overlap add method. Fast computation of DFT - Radix-2 Decimation-in-time (DIT) Fast Fourier transform (FFT), Decimation-in-frequency (DIF) Fast Fourier transform (FFT), Linear filtering using FFT.

INTRODUCTION:

Ethics is a system of moral principles. They affect how people make decisions and lead their lives. Ethics is concerned with what is good for individuals and society and is also described as moral philosophy. The term is derived from the Greek word *ethos* which can mean custom, habit, character or disposition.

Ethics covers the following dilemmas:

- how to live a good life
- our rights and responsibilities
- the language of right and wrong
- moral decisions - what is good and bad?

Our concepts of ethics have been derived from religions, philosophies and cultures. They infuse debates on topics like abortion, human rights and professional conduct. If ethical theories are to be useful in practice, they need to affect the way human beings behave. Some philosophers think that ethics does do this. They argue that if a person realizes that it would be morally good to do something then it would be irrational for that person not to do it. However, ethics does provide good tools for thinking about moral issues.

OBJECTIVES:

- To promote student's awareness and confidence in the integrity, objectivity, competence and professionalism
- To increase ethical sensitivity of students
- To increase ethical knowledge
- To improve ethical judgment
- To enhance ethical will-power

M. S. S.
PRINCIPAL
K S R INSTITUTE FOR
ENGINEERING AND TECHNOLOGY,
K S R KALVINAGAR,
TIRUCHENGODE-637 215,
NAMAKKAL DC, TAMIL NADU.

PREREQUISITES:

- Basic knowledge about the engineering profession
- To know about the moral values and issues regarding the environment

APPLICATIONS:

- To, identify, study and resolving the ethical problems occurring in the practice of engineering profession
- To articulate what it means to be a professional, and the ethical implications of being a professional
- To understand the distinction between legal and ethical issues

COURSE OUTCOMES:

At the end of the Course the students will be able to:	
CO1	Compare and human values and code of ethics in engineering.
CO2	Manipulate the new things from the case studies.
CO3	Analyze strategies and critical thinking in real life situations.
CO4	Demonstrate the responsibilities and rights of the professionals.
CO5	Recognize and solve the Global issues in ethical actions.

PROGRAM OUTCOMES (POs)			
PO1	Engineering Knowledge	PO7	Environment and sustainability
PO2	Problem Analysis	PO8	Ethics
PO3	Design/development of solutions	PO9	Individual and team work
PO4	Conduct investigations of complex problems	PO10	Communication
PO5	Modern tool usage	PO11	Project management and finance
PO6	The Engineer and society	PO12	Life-long learning
PROGRAM SPECIFIC OUTCOMES (PSOs)			
Embedded system design: Analyze, design, construct and test electronic and embedded systems for desired specification.			
Simulation Tools: Solve emerging real world problems using suitable hardware and software tools.

INTRODUCTION ABOUT THE COURSE:

Medical electronics deals with the instrumentation used in physiological measurement. Developments in electronics technology have offered new and enhanced applications, especially in the areas of data recording and analysis and imaging technology. These techniques help to identify the disorders in human body and to treat them on time.

In unit I, Electro-Physiology and Bio-Potential Recording discuss the basic electronic equipments used in medical applications. The origins of bio potential with its electrodes are briefly explained. The types of amplifiers used in biological field helps in processing the real time signals detected from human body. The devices used to measure the electrical signal from various part of the body are explained. The devices such as Electro cardiograph, Electro Encephalography, Electromyography and Phonocardiogram are briefly explained with its working procedures. The operation of these devices helps the students to re model the existing devices and so can be used for advanced measurement of electrical signals. The electrical signal measurement helps in understanding the working condition of various parts of the body. The above mentioned equipments help in measuring the electrical signals from heart, brain, eyes and muscles.

In unit II, Bio-Chemical and Non Electrical Parameter Measurement deals with the measurement of PH, CO₂ and O₂ in the blood flow. This measurement helps to maintain the chemical balance of the human body. The absence of this chemical balance causes various disorders. The designing of this equipment and the working block diagram were explained. The measurement of Protein in plasma and urine were done with the help of a technique called Electrophoresis. This technique also helps to identify the antibodies. The devices such as Colorimeter, Flame photometer and spectrometer make the analysis much easier.

In Unit III, Assist device, brief out on the assisting devices with its working principle and operation in medical field. The cardiac pacemakers help the heart to pump blood in case on any block present in the valves. Defibrillator helps to maintain synchronization of heart. In case of kidney failure, the device called Dialyzer is used for the purification of blood. This assisting device helps for the proper functioning of human body.

In Unit IV, Physical Medicine and Biotelemetry discuss with Telemetry principles and Diathermy used in medical field. Diathermy is the treatment process by which cutting, coagulation of tissues are obtained. Telemetry is a technology that allows remote measurement and reporting of information.

In the last unit, the students will learn the recent Instruments used in medical field.

OBJECTIVES:

- To gain knowledge about the various physiological parameters both electrical and non electrical and the methods of recording and also the method of transmitting these parameters.
- To study about the various assist devices used in the hospitals
- To gain knowledge about equipment used for physical medicine and the various recently developed diagnostic and therapeutic techniques.

PREREQUISITES:

- Life sciences and health care units.
- Design and problem solving skills of engineering with medical and biological sciences.
- Fundamentals of Biomedical Signal and Image Processing.

APPLICATIONS:

1. Information gathering: To measure natural phenomena and other variables to aid man in his quest for knowledge about himself and the universe in which he lives. In this setting, the characteristics of the measurements may not be known in advance.

2. Diagnosis: Measurements are made to help in the detection and, hopefully, the correction of some malfunction of the system being measured.

3. Evaluation: Measurements are used to determine the ability of a system to meet its functional requirements.

4. Monitoring: To monitor some process or operation in order to obtain continuous or periodic information about the state of the system being measured.

5. Control: To automatically control the operation of a system based on changes in one or more of the internal parameters or in the output of the system.

COURSE OUTCOMES:

At the end of the semester students will be able to

CO1: Know the human body electro- physiological parameters and recording of bio-potentials

CO2: Comprehend the non-electrical physiological parameters and their measurement – body Temperature, blood pressure, pulse, blood cell count, blood flow meter etc.

CO3: Interpret the various assist devices used in the hospitals viz. pacemakers, defibrillators, Dialyzers and ventilators

CO4: Comprehend physical medicine methods eg. ultrasonic, shortwave, microwave surgical Diathermics and bio-telemetry principles and methods.

CO5: Know about recent trends in medical instrumentation

INTRODUCTION ABOUT THE COURSE:

Medical electronics deals with the instrumentation used in physiological measurement. Developments in electronics technology have offered new and enhanced applications, especially in the areas of data recording and analysis and imaging technology. These techniques help to identify the disorders in human body and to treat them on time.

In unit I, Electro-Physiology and Bio-Potential Recording discuss the basic electronic equipments used in medical applications. The origins of bio potential with its electrodes are briefly explained. The types of amplifiers used in biological field helps in processing the real time signals detected from human body. The devices used to measure the electrical signal from various part of the body are explained. The devices such as Electro cardiograph, Electro Encephalography, Electromyography and Phonocardiogram are briefly explained with its working procedures. The operation of these devices helps the students to re model the existing devices and so can be used for advanced measurement of electrical signals. The electrical signal measurement helps in understanding the working condition of various parts of the body. The above mentioned equipments help in measuring the electrical signals from heart, brain, eyes and muscles.

In unit II, Bio-Chemical and Non Electrical Parameter Measurement deals with the measurement of PH, CO₂ and O₂ in the blood flow. This measurement helps to maintain the chemical balance of the human body. The absence of this chemical balance causes various disorders. The designing of this equipment and the working block diagram were explained. The measurement of Protein in plasma and urine were done with the help of a technique called Electrophoresis. This technique also helps to identify the antibodies. The devices such as Colorimeter, Flame photometer and spectrometer make the analysis much easier.

In Unit III, Assist device, brief out on the assisting devices with its working principle and operation in medical field. The cardiac pacemakers help the heart to pump blood in case on any block present in the valves. Defibrillator helps to maintain synchronization of heart. In case of kidney failure, the device called Dialyzer is used for the purification of blood. This assisting device helps for the proper functioning of human body.

In Unit IV, Physical Medicine and Biotelemetry discuss with Telemetry principles and Diathermy used in medical field. Diathermy is the treatment process by which cutting, coagulation of tissues are obtained. Telemetry is a technology that allows remote measurement and reporting of information.

In the last unit, the students will learn the recent Instruments used in medical field.

OBJECTIVES:

- To gain knowledge about the various physiological parameters both electrical and non electrical and the methods of recording and also the method of transmitting these parameters.
- To study about the various assist devices used in the hospitals
- To gain knowledge about equipment used for physical medicine and the various recently developed diagnostic and therapeutic techniques.

PREREQUISITES:

- Life sciences and health care units.
- Design and problem solving skills of engineering with medical and biological sciences.
- Fundamentals of Biomedical Signal and Image Processing.

APPLICATIONS:

1. **Information gathering:** To measure natural phenomena and other variables to aid man in his quest for knowledge about himself and the universe in which he lives. In this setting, the characteristics of the measurements may not be known in advance.

2. **Diagnosis:** Measurements are made to help in the detection and, hopefully, the correction of some malfunction of the system being measured.

3. **Evaluation:** Measurements are used to determine the ability of a system to meet its functional requirements.

4. **Monitoring:** To monitor some process or operation in order to obtain continuous or periodic information about the state of the system being measured.

5. **Control:** To automatically control the operation of a system based on changes in one or more of the internal parameters or in the output of the system.

COURSE OUTCOMES:

At the end of the semester students will be able to

CO1: Know the human body electro- physiological parameters and recording of bio-potentials

CO2: Comprehend the non-electrical physiological parameters and their measurement – body Temperature, blood pressure, pulse, blood cell count, blood flow meter etc.

CO3: Interpret the various assist devices used in the hospitals viz. pacemakers, defibrillators, Dialyzers and ventilators

CO4: Comprehend physical medicine methods eg. ultrasonic, shortwave, microwave surgical Diathermics and bio-telemetry principles and methods.

CO5: Know about recent trends in medical instrumentation

PROGRAM OUTCOMES (POs)			
PO1	Engineering Knowledge	PO7	Environment and sustainability
PO2	Problem Analysis	PO8	Ethics
PO3	Design/development of solutions	PO9	Individual and team work
PO4	Conduct investigations of complex problems	PO10	Communication
PO5	Modern tool usage	PO11	Project management and finance
PO6	The Engineer and society	PO12	Life-long learning
PROGRAM SPECIFIC OUTCOMES (PSOs)			
PSO1	Embedded system design: Analyze, design, construct and test electronic and embedded systems for desired specification.		
PSO2	Simulation Tools: Solve emerging real world problems using suitable hardware and software tools.

INTRODUCTION ABOUT THE COURSE

Digital signal processing (DSP) is the mathematical manipulation of an information signal to modify or improve it in some way. It is characterized by the representation of discrete time, discrete frequency, or other discrete domain signals by a sequence of numbers or symbols and the processing of these signals. The goal of DSP is usually to measure, filter and/or compress continuous real-world analog signals.

The first step is usually to convert the signal from an analog to a digital form, by sampling and then digitizing it using an analog-to-digital converter (ADC), which turns the analog signal into a stream of numbers. However, often, the required output signal is another analog output signal, which requires a digital-to-analog converter (DAC). Even if this process is more complex than analog processing and has a discrete value range, the application of computational power to digital signal processing allows for many advantages over analog processing in many applications, such as error detection and correction in transmission as well as data compression.

MATLAB (matrix laboratory) is a paradigm numerical environment and fourth-generation programming language. Developed by Math Works, MATLAB allows matrix manipulations, plotting of functions and data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other languages, including C, C++, Java, and Fortran. Although MATLAB is intended primarily for numerical computing, an optional toolbox uses the MuPAD symbolic engine, allowing access to symbolic computing capabilities. An additional package, Simulink, adds graphical multi-domain simulation and Model-Based Design for dynamic and embedded systems.

TMS320C67xx series DSP is a high performance floating-point processor designed for very long instruction word (VLIW) structure, integration of a variety of external interfaces of EMIF, DMA, I2C, SPI, GPIO, has a good scalability. The series DSP is suitable for various kinds of weapons in the center of the platform of computer, especially the need to handle large amounts of data and complex algorithm of computer.

OBJECTIVES:

- To implement Linear and Circular Convolution
- To implement FIR and IIR filters
- To study the architecture of DSP processor
- To demonstrate Finite word length effect

APPLICATIONS:

- ❖ Telecommunication: Echo cancellation in telephone networks, telephone dialing applications, Modems, Line repeaters, Channel multiplexing.
- ❖ Consumer Electronics: Digital Audio/TV, Electronic music synthesizer, Educational toys.
- ❖ Image processing: Image compression, Image enhancement, Image analysis and recognition
- ❖ Medicine: X-ray scanning, Computerized Tomography, Magnetic resonance imaging, analysis of ECG and EEG.
- ❖ Military: Radar signal processing, Sonar Signal processing, Navigation.

PREREQUISITE:

Students should have basic knowledge of the following topics:

- ✓ Basics of signals, systems, transforms and their theoretical & analytical foundations for practical implementation.
- ✓ How the issues arise in mathematical & practical domain in the continuous & discrete time, linear time invariant systems, convolution and Fourier transforms.

OUTCOME:

At the end of the course the students will be able to:

CO1: Carryout basic signal processing operations.

CO2: Demonstrate their abilities towards MATLAB based implementation of various DSP systems.

CO3: Analyze the architecture of a DSP Processor.

CO4: Design and Implement the FIR and IIR Filters in DSP Processor for performing filtering operation over real-time signals.

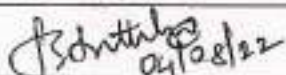

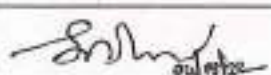

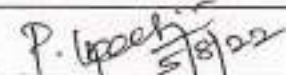

CO5: Design a DSP system for various applications of DSP.

PROGRAM OUTCOMES (POs)			
PO1	Engineering Knowledge	PO7	Environment and sustainability
PO2	Problem Analysis	PO8	Ethics
PO3	Design/development of solutions	PO9	Individual and team work
PO4	Conduct investigations of complex problems	PO10	Communication
PO5	Modern tool usage	PO11	Project management and finance
PO6	The Engineer and society	PO12	Life-long learning
PROGRAM SPECIFIC OUTCOMES (PSOs)			
PSO1	Embedded System Design: Analyze, design, construct and test electronic and embedded systems for desired specification.		
PSO2	Simulation Tools: Solve emerging real world problems using suitable hardware and software tools.		

Mapping of Course outcomes (COs) to Program Outcomes (POs) and Program Specific Outcomes(PSOs)

INTRODUCTION ABOUT THE COURSE

Very Large Scale Integration (VLSI) is the process of creating an Integrated Circuit (IC) by combining thousands of transistors into a single chip. Unit I deal with the characteristics of MOS transistors which are the basic component for designing IC's. Unit II & Unit III deals with analysis of all the static and dynamic characteristics of the transistors in which the combinational and sequential circuits are designed with various parameters. Unit IV deals with the design of IC's for various arithmetic operations and its simulation is performed. Unit V deals with the implementation of logic design in a hardware either in FPGA or ASIC. Finally the process is subjected under Testing in different techniques before the product is manufactured.

OBJECTIVES:

- Study the fundamentals of CMOS circuits and its characteristics.
- Learn the design and realization of combinational & sequential digital circuits.
- Architectural choices and performance tradeoffs involved in designing and realizing the circuits in CMOS technology are discussed
- Learn the different FPGA architectures and testability of VLSI circuits.

APPLICATIONS:

- To identify the problems in the Integrated circuits and provide solution in Mobile phone.
- To understand the concept involved in Audio and video signal processing
- To enrich the technical knowledge in designing Robotics & Industrial automations.
- To design the electronic circuits in low power, delay and area.

PREREQUISITE:

- Use different analysis and verification tools, implementation and synthesis methodologies and testability techniques that will enable them to design high performance and efficient digital systems.
- CMOS designs and assess which particular design style to use on a given design, from Field Programmable Gate Arrays to full custom design.

COURSE OUTCOME:

At the end of the course, the students will be able to,

- CO1: Realize the concepts of digital building blocks using MOS transistor
- CO2: Design combinational MOS circuits and power strategies
- CO3: Design and construct Sequential Circuits and Timing systems
- CO4: Design arithmetic building blocks and memory subsystems
- CO5: Apply and Implement FPGA design flow and testing

PROGRAM OUTCOMES (POs)			
PO1	Engineering Knowledge	PO7	Environment and sustainability
PO2	Problem Analysis	PO8	Ethics
PO3	Design/development of solutions	PO9	Individual and team work
PO4	Conduct investigations of complex problems	PO10	Communication
PO5	Modern tool usage	PO11	Project management and finance
PO6	The Engineer and society	PO12	Life-long learning
PROGRAM SPECIFIC OUTCOMES (PSOs)			
PSO1	Embedded system design: Analyze, design, construct and test electronic and embedded systems for desired specification.		
PSO2	Simulation Tools: Solve emerging real world problems using suitable hardware and software tools.

INTRODUCTION:

This laboratory experiments introduces the Verilog Hardware Description Language (HDL) and shows you how to model and simulate basic combinational and sequential circuits. HDLs, such as, Verilog, are used extensively in the process of designing and implementing FPGA families. This course also provides an introduction to the design and implementation of VLSI circuits for complex digital systems. The focus is on CMOS technology.

OBJECTIVES:

- To understand the HDL-based design flow
- To understand the basic features of the modules in Verilog HDL
- To design a combinational digital system in Verilog HDL
- To design a Sequential digital system in Verilog HDL
- To understand the Chip Level design through implement in Spartan 6 FPGA families
- To create models of moderately sized CMOS circuits that realize specified digital functions
- To apply CMOS technology-specific layout rules in the placement and routing of transistors and interconnect, and to verify the functionality, timing, power, and parasitic effects
- To acquire a knowledge in simulation tools such as Xilinx, Microwind and Digital Schematic

APPLICATIONS:

- Used for Designing and fabricating Integrated Circuits
- Used for manufacturing low power, high speed handheld devices
- Used in Mobile phones, PC, Laptop, Television etc.,

PREREQUISITES:

- Basic knowledge on designing Digital circuits based on design specification
- Basic concepts on designing Combinational and Sequential circuits
- Basic knowledge on operation of NMOS and PMOS transistors

COURSE OUTCOMES:

At the end of Laboratory the students will be able to:

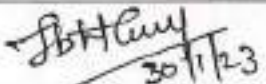

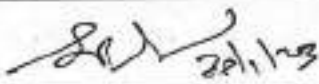

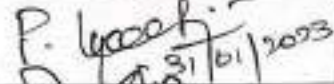

- CO1: Write HDL code for basic as well as advanced digital integrated circuit
- CO2: Import the logic modules into FPGA Boards
- CO3: Synthesize Place and Route the digital IPs
- CO4: Design, Simulate and Extract the layouts of Digital IC Blocks using EDA Tools
- CO5: Design, Simulate and Extract the layouts of Analog IC Blocks using EDA Tools

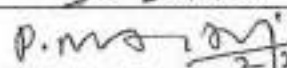

PROGRAM OUTCOMES (POs)			
PO1	Engineering Knowledge	PO7	Environment and sustainability

		the intake.			
9.	Admission / Enrollment details	The committee appreciated the admission process and intake.			
10.	Analysis on PEO, PSO, PO and CO attainment with POCAT, Graduate Exit Survey and University Exams attainment with POCAT, Graduate Exit survey and University Exams.	The evaluated attainment of PEO, PSO, PO and CO attainment with POCAT, Graduate Exit Survey and University Exams are analyzed. CO attainment with POCAT, Graduate Exit Survey and University Exams are analyzed. It is found that all the courses have attained the target levels. Dr.T.Laxmikandan gave suggestions to concentrate in the Academic performance of students in University exams.	Programme Coordinator instructed all the Module Coordinators to follow as given below. <ul style="list-style-type: none"> • NPTEL videos to be projected to the student for the easy understanding. • Animated videos to be projected for the better understanding. 	PC	C
11.	Analysis on PEO, PO, PSO and CO attainment with Continuous Assessments, CES and COCAT	The evaluated attainment of PEO, PSO, PO and CO attainment with continuous assessments. Course End survey and COCAT are analyzed Some suggestions have been given by Dr.P.Vijayakumar such as: <ul style="list-style-type: none"> • Teaching & Learning process should be modified according to students level. • There should be systematic methodology development for Student centric learning process. • Various pedagogical methods have to employed and there should be an evaluation procedure for each method. • Feedback should be obtained periodically for the pedagogical methods employed and based on that feedback, change the methods / procedures accordingly. 	Based on the performance Peer Learning between students and activity based teaching and learning process to be done for improving their grades during end semester exams. Programme Coordinator instructed all the Module Coordinators to follow as given below. <ul style="list-style-type: none"> • Teaching & Learning process should be modified according to students level. • Various pedagogical methods have to employed for students centric learning and develop an evaluation procedure for each method. • Feedback should be obtained periodically for the pedagogical methods employed and based on that feedback, change the methods / procedures. 	PC	C

 PRINCIPAL,

12.	Review of Target level prescription and setting	Review of Target level for R2017 and R2021 has been done and found to be good.	-	PC	C
13.	Analysis on Placement and Training activities	The percentage of placement and training for the batch 2023 batch upto February is 76.5%. Hence the committee appreciated.	Programme Coordinator advised the faculties and suggested the students to apply for more internships and VACs for improving on more practical skills.	PC	C.
14.	Analysis of project activities and consultancy works.	The committee mentioned that minor & major projects have to given to students to analyze their knowledge and skillset. Dr.P.Vijayakumar gave suggestions such as: <ul style="list-style-type: none"> Advanced learners should be motivated to do project work in higher Blooms level and they can be employed in consultancy activities. Students should be given open end problem and students can work on that according to their interest. Faculty mentors has to allotted to each batch from their 2nd year onwards to guide and motivate them. Our Alumni Mr.A.Alexraj suggested that the students can chose their final year project domain in the 3 rd year itself and they can get the guidance of faculty as well as Alumni.	Programme coordinator instructed the faculty members to <ul style="list-style-type: none"> Motivate the Advanced learners to do project work in higher Blooms level and employ them in consultancy activities. Students should be given open end problem so that students can work on that. Encourage the students to chose their domain according to their interest and chose the final year project as earlier as possible in 3rd year itself. 		
15.	Analysis on Students Mentoring & Counseling	The committee reviewed the student mentoring process and suggested to make relationship with parents.	Programme Coordinator advised the faculties who act as mentors to extend a cordial relationship with parents for their effective communication.	PC	C
16.	Analysis of Annual Performance Audit	Student's performance have been analyzed and found to be appreciable one.	-	PC	C
17.	Analysis on Activities Of Industry Institution Interaction (GL, Seminars, Workshops, Alumni Interaction, Professional societies)	Student interaction with industries in terms of internship, industrial projects, Inplant training is progressive. However, the Committee suggested students to convert their innovative ideas into small projects and to create their own	Programme Coordinator instructed the module coordinators to give mapping for the activities of Industry Institution Interaction and set the evaluation metric to measure	PC	C

		startups. Dr.P.Vijayakumar suggested to map these activities in attainment and set some evaluation metrics to measure it's outcome	its outcome.		
18.	Analysis on Co-curricular (Industry projects, VACs, Workshops organized) and extracurricular activities (Sports)	Students co-curricular and extracurricular activities have been reviewed and found that 132 have participated in various events and more students participates. Hence the committee appreciated.	Programme Coordinator advised the faculties to motivate the students to convert their innovative ideas into small projects and to create their own startups.	PC	C
19.	Analysis on Students performance in Online Certification Courses and in Competitive exams (GATE)	Committee suggested that the Students participation in online courses and no. of students attending GATE/competitive examshas to be improved.	Programme Coordinator advised the faculties to motivate their students during class and mentor hour to update their knowledge through online courses and make the 3 rd and 4 th year students to attend GATE exam.	PC	C
20.	Analysis on activities of professional societies and students cells, Club and forum.	No. of programs conducted by Professional societies and student forum are appreciable.	-	PC	C
21.	Analysis on feedback from Academic Review meeting, Class Committee meeting and Students feedback	Academic Review meeting, Class Committee meeting and Students feedback collection has been carried out frequently. Suggestions given by them have been analyzed and rectified then and there. Hence the committee appreciated.	-	PC	C
22.	Analysis on Social responsibilities and Extension activities	The committee found satisfactory on the activities performed regarding to NSS, NCC.	-	PC	C
23.	Analysis on Department MoUs	The committee found satisfactory towards signing MoUs with Industry for the Institute and student benefits.	-	PC	C
24.	Analysis on Department Library	The committee suggested adding more books for R2021, competitive exams and higher studies related books.	Programme Coordinator asked the Department Library Incharge to take necessary steps to add on more books.	PC	C
25.	Analysis on Grievances/redressal of Visaka, Anti-ragging, SC/ST Cell, Hostel Committee,	The committee reviewed the Grievances and found satisfactory towards the measures taken for it.	-	PC	C

Circular

The Department Advisory Committee meeting for the academic year 2022-2023 odd semester has been scheduled on 10.08.2022 at 10.00am in Board Room. The following Department Advisory Committee members are requested to attend the meeting without fail.

1. Mr.P.Govindaraju	HOD & Programme Coordinator /ECE
2. Dr.R.Nandakumar	Professor & Director - Administrations / ECE
3. Dr.S.Premalatha	Associate Professor /ECE
4. Dr.S.Jayachitra	Associate Professor /ECE
5. Mr.M.V.Mahesh	Assistant Professor / ECE
6. Ms.B.Latha	Assistant Professor / ECE
7. Dr.J.C.Kannan	Director - Student Affairs & Professor/Physics
8. Dr.P.Meenakshi Devi	Director - Academics & Professor /IT
9. Dr.P.Murugesan	Director - III & SD & Professor / Mechanical
10. Dr.R.Jeyabharath	Controller of Examination & Professor / EEE
11. Dr.P.Veena	IQAC Coordinator & Professor / EEE
12. Mr.Balakumar Chinnusamy	Industry Expert
13. Mr.A.Kannan	Industry Expert
14. Dr.T.Laxmikandan	Academician
15. Dr.P.Vijaykumar	Academician
16. Mr.A.Alexraj	Alumni
17. Mr.S.Thulasiraman	Alumni
18. Mr.P.Ranjith kumar	Student
19. Ms.K.Harshini	Student
20. Mr.P.Dharmasastha	Student
21. Mr.S.Hari Babu	Parent
22. Mr.A.Sivakumar	Parent

Agenda:

- Review of Vision, Mission, PEO, PO and PSOs
- Changes in contents of Curriculum, Syllabus and COs
- Analysis on CO attainment with University exams
- Review of Target level Prescription and setting
- Analysis on Placement and Training activities

PRINCIPAL,
K S R INSTITUTE FOR
ENGINEERING AND TECHNOLOGY,
K S R KALVINAGAR,

VISION: To produce globally competitive Electronics and Communication Engineers and Entrepreneurs with ethical values

MISSION:

- DM1: Impart quality education through student centric teaching and learning process.
- DM2: Equip students with Industry driven skills by providing excellent Infrastructure and continuous interaction with Academia and Industry.
- DM3: Empower students towards research, entrepreneurship and lifelong learning to meet societal needs.

Department Advisory Committee meeting

Minutes of Meetings

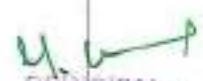

Academic Year/ Sem: 2022-2023 / ODD

DATE OF MEETING: 10.08.2022

VENUE: ECE Seminar Hall

The following DAC members attended the meeting

- | | |
|-----------------------------|--|
| 1. Mr.P.Govindaraju | HOD & Programme Coordinator / ECE |
| 2. Dr.R.Nandakumar | Professor & Director - Administrations / ECE |
| 3. Dr.S.Premalatha | Associate Professor / ECE |
| 4. Dr.S.Jayachitra | Associate Professor / ECE |
| 5. Mr.M.V.Mahesh | Assistant Professor / ECE |
| 6. Ms.B.Latha | Assistant Professor / ECE |
| 7. Dr.J.C.Kannan | Director - Student Affairs & Professor / Physics |
| 8. Dr.P.Meenakshi Devi | Director - Academics & Professor / IT |
| 9. Dr.P.Murugesan | Director - III & SD & Professor / Mechanical |
| 10. Dr.R.Jeyabharath | Controller of Examination & Professor / EEE |
| 11. Dr.P.Veena | IQAC Coordinator & Professor / EEE |
| 12. Mr.Balakumar Chinnusamy | Industry Expert |
| 13. Mr.A.Kannan | Industry Expert |
| 14. Dr.T.Laxmikandan | Academician |
| 15. Dr.P.Vijaykumar | Academician |
| 16. Mr.A.Alexraj | Alumni |
| 17. Mr.S.Thulasiraman | Alumni |
| 18. Mr.P.Ranjith kumar | Student |
| 19. Ms.K.Harshini | Student |
| 20. Mr.P.Dharmasastha | Student |
| 21. Mr.S.Hari Babu | Parent |
| 22. Mr.A.Sivakumar | Parent |

NAMAKKAL DI, TAMIL NADU.

The HOD and Convener of the Department Advisory Committee presented the following activities of the department for the academic year 2022-2023 Odd Semester. The following suggestions are given by the committee and remedial actions are taken for improving the performance of the department during the academic year 2022-2023 odd semester.

S. No.	Agenda	Discussion	Action taken	Resp	Target
1.	Review of previous IQAC Meeting suggestions.	The committee appreciated the suggestions of IQAC and recommended to follow the same.	-	PC	C
2.	Review of previous Governing Council suggestions.	The committee reviewed the suggestions of Governing Council and recommended to follow the same.	-	PC	C
3.	Review of DAC meeting comments and approval of Academic activities.	The committee reviewed the previous comments and approved for the academic activities.	-	PC	C
4.	Review of Department Vision, Mission, PEO, PSO and POs	No recommendations received from the stakeholders on change of Vision, Mission, PEO, PSO and POs. After detailed discussion, it is resolved to continue as it is.	-	PC	C
5.	Changes in contents of curriculum, syllabus and COs	Curriculum, Syllabus and COs for the Regulation 2021 has been reviewed and finalized.	-	PC	C
6.	Quality Assurance Initiatives	The committee appreciated on the Quality Assurance Initiatives and suggested to follow the same.	-	PC	C
7.	Budget Allocation and approval for the current Academic year and requirements for the next academic year.	The committee verified the Budget allocation and found to be good & they suggested No comments.	-	PC	C
8.	Increase and Decrease in intake	There is no change in intake as discussed in the previous meeting. Hence, committee approved the intake.	-	PC	C
9.	Admission /Enrollment details	The committee appreciated the admission process and intake.			
10.	Analysis on PEO, PSO, PO and CO attainment with POCAT, Graduate Exit Survey and University Exams attainment with POCAT, Graduate Exit survey and University Exams.	The evaluated attainment of PEO, PSO, PO and CO attainment with POCAT; Graduate Exit Survey and University Exams are analyzed. CO attainment with POCAT, Graduate Exit Survey and University Exams are analyzed. It is found that all the courses have attained the target levels. Some suggestions have been given by Dr.P.Vijayakumar such as: <ul style="list-style-type: none"> NPTEL videos to be projected to the student for the easy understanding. 	Programme Coordinator instructed all the Module Coordinators to follow as given below. <ul style="list-style-type: none"> NPTEL videos to be projected to the student for the easy understanding. Animated videos to be projected for the better understanding. More case study to be given 	PC	C

		<ul style="list-style-type: none"> Animated videos to be projected for the better understanding. More case study to be given on real time applications. Mini projects have to be provided more. 	<ul style="list-style-type: none"> on real time applications. Mini projects have to be provided more. 		
11	Analysis on PEO, PO, PSO and CO attainment with Continuous Assessments, CES and COCAT	The evaluated attainment of PEO, PSO, PO and CO attainment with continuous assessments. Course End survey and COCAT are analyzed and found that the courses such as FDS and DE have not attained. Hence the committee suggested students to concentrate more on Academic activities.	Based on the performance Peer Learning between students and activity based teaching and learning process to be done for improving their grades during end semester exams.	PC	C
12	Review of Target level prescription and setting	Review of Target level for R2017 and R2021 has been done and found to be good.		PC	C
13	Analysis on Placement and Training activities	The percentage of placement and training for the batch 2022 batch is 51.8%. Hence the committee appreciated. However, Mr.A.Alexraj suggested the students to apply for more internship and VACs for improving on more practical skills.	Programme Coordinator advised the faculties and suggested the students to apply for more internships and VACs for improving on more practical skills.	PC	C
14	Analysis on Students Academic Performance	Student's academic performance have been analyzed and found that, with the usage of more ICT tools and learning by doing activities in many courses, it is appreciable one.		PC	C
15	Analysis on activities of Industry Institution Interaction	Student interaction with industries in terms of internship, industrial projects, Inplant training is progressive. The board suggested to improve further by contacting with more industries.		PC	C
16	Analysis on Student Participation in meets	Students co curricular and extracurricular activities have been reviewed and found that, 52 number of students have received prizes in various events and more students participated.		PC	C
17	Analysis on Student performance in competitive exams	Student participations in competitive exams are found good and ongoing GATE Exam coaching cum mock test is appreciable.		PC	C
18	Analysis on activities of professional societies and student forum	Number of programs conducted by Professional societies and student forum are appreciable.		PC	C
19	Analysis on feedback from Academic Review, Class Committee Meeting and Student's feedback	Academic review, Class committee meeting and students feedback collection has been carried out frequently. Suggestions given by them were analyzed and rectified then and there.		PC	C

 PRINCIPAL,

Minutes of Class Committee Meeting

Meeting No. : 02	Year / Sem : III / VI	Date : 25.03.23 Venue : CSE Dept
Attended by: All subject handling faculty members, Class advisor, Chair person, HoD-CSE.		

S.No	Topic	Discussion / Action to be taken	Responsibility	Target
1	Mobile Computing	His teaching is good and taught the topics very fast. Need to interact with students.	Dr.N.B.Maheshkumar	Continuous
2	Internet Programming	No issues in the subject. Some concepts need more examples. Need more hands on training sessions.	Mr.P.Anispremkoilraj	Continuous
3	Artificial Intelligence	His teaching methodology is good and there is no issue in the subject.	Mr.K.Vinoth	Continuous
4	Compiler Design	No issues in the subject. Need some	Dr.M.Vimaladevi	Continuous
5	Distributed Systems	No issues in the subject. Can't follow the given material so need some alternate materials.	Ms.D.Kavinya	Continuous
7	Internet Programming Laboratory	5 exercises completed. Easy to understand.	Mr.P.Anispremkoilraj	Continuous
8	Mobile Application Development Laboratory	4 exercises completed. Easy to understand.	Mr.K.Vinoth	Continuous
9	Mini Project	Students are insisted to survey on real time applications. Need to publish the papers in conferences.	Mr.V.Prakasham	Continuous

Meeting No. : 02	Year / Sem : II / IV	Date : 24.03.23 Venue : CSE Department
Attended by: All subject handling faculty members, Class advisor, Chair person, HoD-CSE.		

S.No	Topic	Discussion / Action to be taken	Responsibility	Target
1.	Artificial Intelligence and Machine Learning	Require More Real time examples to understand ML concepts clearly.	Mr.M.Boobalan	Continuous
2.	Database Management Systems	A2Z activity conducted, helpful to recollect the topic clearly. No issues in the subject.	Mrs.R.Deebika	Continuous
3.	Algorithms	Need more explanation for every algorithm to understand the topic better .Elaborated notes needed to represent the content in IA exam	Mrs.P.Nithya	Continuous
4.	Theory of Computation	No issues in the subject. Need extra hours to solve the more example problems.	Mr.V.Prakasham	Continuous
5.	Introduction to Operating Systems	Small topic given for seminar that helps to recognize the concept easily. Video link given to understand the concept more effectively.	Mr.C.Karthikeyan	Continuous
6.	Environmental Sciences and Sustainability	Teaching methodology is good and there is no issue in the subject.	Dr.S.Agiladevi	Continuous
7.	Operating Systems Laboratory	4 exercises completed. Easy to understand.	Mr.C.Karthikeyan	Continuous
8.	Database Management Systems Laboratory	5 exercises completed. Easy to understand.	Mrs.R.Deebika	Continuous
9.	Artificial Intelligence and Machine Learning	2 exercises completed. Easy to understand.	Mr.M.Boobalan	Continuous
10.	Algorithms Laboratory	4 exercise completed. Easy to understand.	Mrs.P.Nithya	Continuous

Minutes of Class Committee Meeting

Meeting No. : 03	Year / Sem : II / IV	Date : 26.04.23 Venue : CSE Lab
Attended by: All subject handling faculty members, Class advisor, Chair person, HoD-CSE.		

S.No	Topic	Discussion / Action to be taken	Responsibility	Target
1	Theory of Computation	Seminar handled by inter department faculty. It is helpful to understand the concept in different way.	Mr.V.Prakasham	Continuous
2	Artificial Intelligence and Machine Learning	No issue in the subject. Asked the students to study and implement the machine learning projects.	Mr.M.Boobalan	Continuous
3	Database Management Systems	No issues in the subject. Motivated students to take seminar in the class.	Mrs.R.Deebika	Continuous
4	Algorithms	Need more explanation for algorithm concept to understand the algorithm more easily.	Mrs.P.Nithya	Continuous
5	Introduction to Operating Systems	Concept explained very clearly so it is easy to understand and remember while writing exam.	Mr.C.Karthikeyan	Continuous
7	Environmental Sciences and Sustainability	No issues in the subject. Used Various teaching methodology and conducted activity that help students to participate and learn that topic easily.	Dr.S.Agiladevi	Continuous
8	Operating Systems Laboratory	14 Exercises completed. Easy to understand.	Mr.C.Karthikeyan	Continuous
9	Database Management Systems Laboratory	11 Exercises completed. Easy to understand.	Mrs.R.Deebika	Continuous
10.	Artificial Intelligence and Machine Learning	12 Exercises completed. Easy to understand.	Mr.M.Boobalan	Continuous

STUDENT FEEDBACK

Subject :	Computer Networks
Academic Year :	2022 - 23 (ODD)
Class :	III Year
Faculty :	Mr.P.Ravi

Questions	Excellent	VeryGood	Good	Satisfactory	Poor	Consolidated
Punctuality of faculty member	25	24	12	0	0	8.10
Has the faculty member covered entire Syllabus as prescribed by College?	20	25	15	1	0	8.03
Has the faculty member covered relevant topics beyond syllabus	22	18	21	0	0	7.90
Technical content/course content delivered by faculty member	20	19	21	1	0	8.03
Communication skills of faculty member	20	23	17	1	0	7.84
Use of teaching aids / ICT tools	15	27	18	1	0	8.23
Encouragement by faculty member to students in learning recent trends	23	23	14	1	0	7.93
Guidance for the development of Students skill through Practical demonstration / Hands on training	18	24	18	1	0	8.26
Mentoring / Support given on Students progress by faculty member	21	27	13	0	0	8.26
Readiness to offer help and advice to students	24	21	16	0	0	8.16
Consolidated Score :						8.08
Evaluation :						VERY GOOD

Final Result is generated by the following conditions:

If total consolidated value is **9.0** and above then the result is **EXCELLENT**

If total consolidated value is **7.5** and above and below **9.0** then the result is **VERY GOOD**

If total consolidated value is **6.0** and above and below **7.5** then the result is **GOOD**

If total consolidated value is **5.5** and above and below **6.0** then the result is **SATISFACTORY**

If total consolidated value is below **5.5** then the result is **POOR**

Institute Address:	K S R INSTITUTE FOR ENGINEERING AND TECHNOLOGY, KSR KALVI NAGAR, TIRUCHENGODE - 637215, NAMAKKAL.

Best Practices By Institute:

Reformed Teaching Learning Process

In education, teachers facilitate student learning which helps students gain skills knowledge and thinking ability. Different ways to teach are often referred to as pedagogy. Teaching using pedagogy involves assessing the educational levels of the students on particular skills. Understanding the pedagogy of the students in the class room involves using differentialised instruction as well as supervision to meet the needs of all students in the classroom.

(a) Student Centric Learning

As we found a few difficulties in the traditional method of chalk and talk teaching, we have set up the classroom as student centric namely Reformed Teaching Learning (RTL) process. In this RTL method, the interaction by students has improved considerably.

(b) Activity Based Learning

As this new process is connected with activity based learning such as role play, students get more space to interact with teachers and classmates. Further, PPTs, Videos, OHPs and short seminars are being used in the RTL method that results in easy understanding of the concepts by students.

(c) Project Based Learning

The RTL method provides a detailed learning to students and also reduces them to initiate a project on the basis of what they have learnt in the classroom.

(d) Technical Quiz

To get in-depth knowledge in subjects, technical quiz is conducted in each subject which helps students to have specified learning.

(e) Mentoring

The teachers meet students periodically, collect the pros and cons of this method and counsel them to remove the difficulties in their academic performance; this method is called 'Mentoring system'; students' personal issues are also discussed and a proper guidance and support is provided to ensure the comfort of students in the campus.

The primary focus of the RTL method is to give students a wide-ranging knowledge, exceptional creativity and more comfort and to bring out their hidden potentials into the limelight.

Centre of Excellence

Centre of Excellence is a function that facilitates the collection of standards and practice in an institution to develop the skills of team members and to promote the institution to the next level. It refers to a team, a shared facility or an entity that provides leadership, practices, research, support and training for a particular area. It is often associated with new software tools, technologies and people's network. It also focus on a particular area of research, such center may bring together the faculty members from different disciplines and provide share facilities.

To meet the requirements of industries, value added courses are organized for students through this forum.

As learning is the continuous process, Faculty Development Programme (FDP) is organized once in a semester to update knowledge and to promote skills of the faculty members.

Sponsored workshops / FDPs are organized with the financial support from CSIR, ISTE, DRDO, AICTE, DST etc.

Research and Development (R&D) activities are conducted in which both the students and faculty members are equipped.

Skill Development Courses are organized for the students and the faculty members of other institutions.

School Outreach Programmes

It is important to know that the school Teachers should shape their students who go for higher education and should be aware of the latest trend of professional courses such as B.E., & B.Tech. Also the school students should equip their qualities in all the manner while they transform from school to college/university.

To create awareness and to bridge the gap on these aspects, we have designed a few outreach programmes for students and teachers of school.

The following are the benefits of the programmes:

- Teachers will get awareness about the latest teaching aids.
- Providing practical oriented teaching.
- Difficulties and barriers of subjects will be cleared thoroughly.
- Hands-on training to teachers by the Resource Persons from industries.
- Bringing school students to this campus and facilitating them to access the college resources.

School students come to know about the systems followed in colleges.

- Students are given valuable exposure by using the new and different resources beyond the reach of many public schools.
- Motivating them to take up engineering course.
